SKILLS & INTERESTS

- **Skills** *(technical)***:** JavaScript; NodeJS; Python; ReactJS; HTML; CSS; Tailwind CSS; Simultaneous and consecutive interpretation(Korean-English); effective verbal and written communication; time management; creative thinking
- **Interests:** Web development; visual arts; street photography; cooking; pour-over coffee

PROJECTS

Personal Website (shyun.dev)   **2023**
- Developed a front-end with ReactJS, Tailwind CSS, and ES6 modules.
- Managed English and Korean version of website using React Router.
- Created a mobile responsive user experience with Flexbox and media queries through Tailwind.
- Currently implementing the backend with NodeJS to transition the application to a MERN stack to store blog post data and comments.

Dynamic Acoustic Panels (APS111/APS112)   **2020**
- Designed acoustic panels that would meet the NC-15 and NC-20 requirements of Stratford's Studio Theater.
- Collaborated with architecture students to determine the optimal material, design, dimensions, and installation process through the analysis of the HVAC noise data provided by the client.
- Delivered a final product that improved the reverberation time by 0.9 seconds and noise isolation by 8 to 12 percent.
